

## The Essence of Nature...Captured by Brookside

### Brookside Veneers Ltd. - Your Integrated Wood Source for the Future

Since their humble beginning more than 30 years ago, Brookside Veneers has become the industry leader in the marketing and distribution of fine composite veneer products.

Well known for its commitment to quality, Brookside Veneers is also respected for its responsible approach to harvesting and processing wood products. Our composite veneers are crafted exclusively of woods from managed forests... and Alpi, our Italian manufacturer, assures that only environmentally sound principles are employed during the manufacturing process.

The veneers are defect free, easy to work with and unparalleled for consistency in grain and color. We maintain a standing inventory of nearly fifty composite veneers, a wide range of conventional veneers, and we can work with you to create your own customized patterns. Our commitment to excellence and desire to help our customers achieve the best possible results have helped us earn the patronage of the top companies specializing in contract and residential furniture, speakers, ceilings, architectural woodworking, and door manufacturing.

Founder Arne Thomsson, sons David and Eric, and the entire staff at Brookside are dedicated towards bringing the essence of nature into your environment.

No matter the project size, experts are available to assist you.

Discover the Brookside Advantage for yourself.
